MEMORANDUM FOR: Chief, Technical Services Division

SUBJECT : Request for Continuation of Task RR under Contract
RD-26 with [REDACTED]

25X1

1. Description of the Project

Preparation of working drawings and a resume of the major problems anticipated for the fabrication of the Model 2 Air-Fed Incinerator.

2. Purpose of the Project

In recent months an air-film-cooled incinerator has been developed that is quite similar to the Model 1, Type 2 Incinerator, but is smaller and has a reduced burning capacity. This unit, called the Model 2, has been demonstrated at the contractor's plant. A favorable reaction was received to its performance characteristics. This unit is now located at headquarters and is being set up for test and demonstration.

The Office of Security has requested that ten (10) of these Model 2 Incinerators be fabricated at our earliest convenience. It appears that the fabrication can be accomplished by a commercial fabricator using satisfactory working drawings. In order to facilitate the fabrication of these incinerators, and in the interest of economy, this proposed program addition would assure the fabricator of having a good set of working drawings. In addition it would also alert him of the difficulties to be anticipated during fabrication. These drawings and the resume would also aid the prospective fabricators in submitting closer estimates.

3. Recommended Contractor

The recommended contractor for this project is [REDACTED]
[REDACTED] who is currently conducting the development of all of the incinerators at their laboratories.

4. Support Requirements

There is no support required from other Government agencies.

5. Total Cost

The cost of this proposed additional effort is estimated to be \$5,830.00, including a fixed fee of \$330.00. This work will constitute a three months effort. Charges are to be made against Allotment Number 1525-1009-1901.
